

To whom it may concern, I work for a large trucking company. I am not a truck driver, but I am in contact with a lot of them. They find that the weather and traffic reports are a valuable asset. They can get the information they need before they get to a part of the country that they are heading for. Which in turn, makes their job much easier, and safer.

To try to put an end to a service such as this would be wrong! And believe me, many truck drivers are part of the election process, they are also quite informed. Many votes could be lost to those that would be in favor of this. MAKE THE RIGHT CHOICE.
